

Indraprastha Institute of Information Technology, Delhi

IIIT-Delhi - Department of Computer Science & Engineering

Database Management Systems - Unit Notes

Course Resource Package

IIIT-Delhi CSE202 Lecture Notes (DBMS):

- Normalization: Decomposing schemas to eliminate update, delete, and insert anomalies.
- BCNF: A relation schema R is in BCNF if for every $X \rightarrow Y$, X is a superkey.
- ACID Properties: Atomicity (all or nothing), Consistency, Isolation, Durability.
- Conflict Serializability: Checked using precedence graphs (no cycles allowed).
- B+ Tree: All values stored at leaf nodes; leaves linked for range queries.
