IIIT-Delhi - Department of Computer Science & Engineering

Java Programming - Unit Notes

Course Resource Package

IIIT-Delhi CSE102 Lecture Notes:

- JVM compiles source .java to .class bytecode which is interpreted.
- Polymorphism: resolved at runtime (overriding) vs compile-time (overloading).
- Interface methods are public abstract by default; java 8 introduced default methods.
- Generics ensure type safety at compile time (type erasure removes them at runtime).
- Lambda Expressions provide inline implementation of functional interfaces.
