

Indraprastha Institute of Information Technology, Delhi

IIIT-Delhi - Department of Computer Science & Engineering

Operating Systems - Course Syllabus

Course Resource Package

Course Code: CSE331 | Course: Operating Systems

1. Introduction: Operating system structures, system calls, interrupt handling.
2. Processes & Threads: CPU scheduling, process synchronization, classical IPC problems.
3. Memory Management: Paging, segmentation, translation lookaside buffers (TLB), page replacement.
4. File Systems & Storage: Directory structures, allocation methods, disk scheduling (SSTF, SCAN).
5. Deadlocks: Banker's algorithm, prevention, detection, and recovery.
6. Virtualization & Security: Hypervisors, protection rings, access control lists.
