PROFILE

MBA-IT student specializing in Data Analysis with strong interest in Machine Learning and Generative AI. Familiar with Python (Pandas, NumPy, Scikit-learn), data preprocessing, and visualization (Matplotlib, Seaborn, Power BI). Hands-on experience in building ML models, EDA, and predictive analytics projects. Currently expanding expertise in Generative AI, NLP, and ML frameworks to contribute to real-world AI/ML applications.

SKILLS

Technical Skills

- Fundamental knowledge of Python (Pandas, NumPy, Scikit-learn) for introductory data analysis and machine learning tasks.
- Familiar with data visualization and reporting using Excel, Power BI, Matplotlib, and Seaborn.
- Ability to apply machine learning concepts such as data preprocessing, feature engineering, classification models, and predictive modeling.

Soft Skills

- Demonstrated teamwork and collaboration skills through academic and project-based initiatives.
 - Strong emotional intelligence with the ability to build positive relationships and work effectively in diverse teams.
 - High level of flexibility and adaptability to meet varying work demands while maintaining quality
-

PROJECTS

Credit Score Classification – Machine Learning (Python)

- Built a model to classify customer credit scores (Good, Standard, Poor) using demographic and financial data.
- Performed data cleaning, preprocessing, and feature engineering to improve data quality.
- Trained and compared Random Forest and XGBoost models with SMOTE balancing, achieving strong accuracy and F1-scores.
- Evaluated results using ROC-AUC and visualized key feature importances.

Tools: Python, Pandas, NumPy

Cancer Prediction Model – Machine Learning (Python)

- Built a classification model to predict cancer occurrence using supervised ML algorithms (Logistic Regression/Random Forest).
- Evaluated model accuracy using precision, recall, and F1-score; achieved 62% prediction accuracy in Logistic Regression and 82% in Random Forest.

Tools: Python, Pandas, NumPy

Exploratory Data Analysis (EDA) – Amazon Dataset

- Conducted data profiling, cleaning, and transformation to uncover business insights.
- Applied Python libraries (Pandas, Seaborn, Matplotlib) for visualization.
- Generated insights to support decision-making

EDUCATION

MBA – Information Technology (Specialization: Data Analysis)

Present

- Symbiosis Institution of Computer Studies and Research
Specialization in Data Analytics

Bachelor of Management Studies (B.M.S. Finance)

2023

- SIES College of Arts, Science and Commerce, Mumbai University
-

CERTIFICATIONS

- Automation Business Analyst Associate Training - UiPath
- Excel Skills for Business: Essentials – Coursera
- Six Sigma White Belt (In Progress)
