

SCHOLASTIC ACHIEVEMENTS

- Successfully cleared the National Means Cum-Merit Scholarship (NMMS) Examination.

PROFESSIONAL EXPERIENCE

IIIT Delhi | Frontend Intern

Jan 25 - April 25

- Engineered high-fidelity UI/UX wireframes and interactive prototypes in Figma, translating them into pixel-perfect React components to reduce design-to-development cycles by 40%.
- Optimized a responsive web interface using React.js, enhancing cross-device compatibility and user accessibility by 30%.
- Architected a library of 10+ reusable UI components, leveraging modular design principles to decrease long-term maintenance overhead by 25%.

Kompliancenow | Frontend Developer & Data Analyst Intern

July 25 - Dec 25

- Developed the frontend architecture for an AI-driven compliance automation chatbot, improving user task completion efficiency by 35% through an intuitive and responsive interface.
- Performed data analysis on project datasets using Python, Pandas, NumPy, and SQL to identify trends, validate outputs, and generate actionable insights for decision-making.
- Streamlined document processing by integrating OCR (Optical Character Recognition) workflows, enabling automated handling of 100+ PDF and image files with improved accuracy and efficiency.
- Collaborated with backend, machine learning, and analytics teams to deploy AI-generated compliance modules, enhancing workflow reliability by 30% and supporting data-driven automation.

KEY PROJECTS

E-commerce Platform Development — Myntra Clone

Oct 25 - Dec 25

- Built a scalable e-commerce frontend using React and Redux, managing state for over 400 product SKUs.
- Implemented complex features including multi-criteria filtering, dynamic sorting, and persistent cart/wishlist functionality.
- Engineered a custom image fallback mechanism to handle CDN failures, ensuring 100% UI uptime during asset loading errors.

Full-Stack Shopping Application — Amazon Clone

Jun 24 - Aug 24

- Developed a full-stack application using Node.js, Express, and Prisma, facilitating seamless order management and data persistence.
- Integrated secure user authentication and session management to protect checkout workflows.
- Debugged and resolved legacy dependency conflicts and Node.js versioning issues to ensure cross-environment stability.

Restaurant Billing System — React Food Ordering & Billing App

Aug 25 - Sept 25

- Developed a responsive Restaurant Billing System using React.js, implementing component-based architecture, dynamic routing, and reusable UI components for scalable frontend development.
- Built interactive features including restaurant listing, menu browsing, cart management, and automated bill generation, improving order flow and user experience.
- Integrated advanced filtering functionality based on delivery time, ratings, veg/non-veg categories, enabling faster search and personalized customer selection.
- Implemented downloadable invoice/bill generation with real-time cart calculations, optimized state management, and seamless user interactions.

TECHNICAL SKILLS

- Programming Languages:** Python(Matlab), C/C++, Java, JavaScript

- **Data Analytics:** Pandas, Numpy, Excel(Advanced), SQL
- **Data Visualization:** Power BI, Tableau
- **Web Technologies:** React, NextJs, HTML, CSS, Tailwind CSS, Redux, Vite, Bootstrap
- **Backend & Tools:** VS Code, Git, Jupyter Notebook, Google Colab, IntelliJ, Pycharm, Figma, NodeJS, SQL, Flask
- **Hardware & VLSI Tools:** Vivado, LTspice, EagleCad, Proteus7, STM32, Virtuoso

POSITION OF RESPONSIBILITY

Active Volunteer | Umeed - A Drop of Hope May 24 - Oct 24

EXTRA CURRICULAR ACTIVITIES

- Code Clash-2025 — Ranked 134th out of 10,000+ participants in Code Clash 2025. 2025
